

Capital Hospital boasts a state-of-the-art Heart Centre, Endovascular, Major Surgical & Day Theatres as well as a Renal Dialysis Unit.

We are close to all amenities and public transport networks. Capital Hospital has become a niche institution of choice for cardiac, general surgery, oncology and haematology.

### **CAPITAL HEART CENTRE**

We are supported by the largest cardiology group practice in KwaZulu-Natal who have over three decades experience.

This cardiology practice provides cost-effective, peer reviewed and up to date interventional cardiology services.

This is also the only accredited centre for TAVI, left arterial appendage occlusion, percutaneous ASD and PFO closure and is the only centre performing septal ablations for hokum in KZN.

### **CAPITAL DAY THEATRE**

Most medical schemes encourage the use of a Day Theatre to minimise costs. This results in the eradication of co-payments which inevitably increases the reimbursements to surgeons when using the Day Theatre facility.

### **CAPITAL ONCOLOGY**

We are proud to host the only Gynae Oncologist in KZN who has a full-time practice at Capital Hospital. The following procedures are performed by him exclusively:

- > Radical Hysterectomy
- > Debulking surgery for ovarian cancer
- > Trachelectomy
- > Pelvic node dissection
- > Groin node dissection
- > Partial vulvectomy
- > Radical vulvectomy
- > Cone biopsy for technically complicated patients
- > Cystoscopy and stenting for Gynae oncology patients
- > Laparoscopic oncology surgery
- > Sentinel node biopsy pelvic and groin
- > Laser and excision of vulvar and vaginal lesions
- > Diversion surgery for pelvic obstruction
- > HIPEC

### **CANCERS THAT WE CAN TREAT**

- > Cancer of the cervix
- > Cancer of the ovary
- > Cancer of the uterus body
- > Cancer of the endometrium uterus
- > Cancer of the vulvar
- > Cancer of the fallopian tube
- > Cancer of the vagina
- > Gestational Trophoblastic Disease

### **CAPITAL HAEMATOLOGY**

We have an acute leukemia and bone marrow transplant that offers the following services:

- > Stem cell harvesting
- > Autologous and allogeneic transplant
- > Cryopreservation
- > Apheresis service including plasmapheresis, leucapheresis
- > Treatment of malignant haematology including leukemia, lymphomas, myelomas
- > Low dose CT component. [Poepfel et al., 2009]

### **SUPPORT SERVICES ONSITE**

- > Full radiology including MRI and CT imaging facilities
- > P. E. T. Scan
- > Nuclear medicine
- > SANBS 24 hours, 7 days per week making blood products available
- > Full pathology laboratory with 28 pathologists  
*[results available immediately]*
- > Paramedics and ambulance services available
